7+ years	~7,000	Promoted	Cum laude
building production web apps	staff on the system I maintain	to Senior Software Engineer I · Apr 2026	BS Computer Science, MMSU

Profile

Full-stack engineer who builds and maintains the internal systems companies run on: time tracking, HR workflows, APIs and the automation around them. Most of my work is careful change on large, long-lived codebases, adding features without breaking what thousands of people rely on, and using AI agents with guardrails that keep releases safe.

Experience

Cloudstaff Modern Workforce Inc.

Jul 2022 – Present

Senior Software Engineer I PROMOTED — Apr 2026 – Present

Software Engineer II — Jul 2022 – Mar 2026

- Develop and maintain **StaffCentral (~7,000 users)**: time tracking, leave, holidays and log corrections on a large CakePHP 1.3 codebase.
- Build **request-and-approval workflows** with configurable routing, plus HR/Operations reports.
- Ported production endpoints from a legacy CakePHP 3 service to a **Laravel 12 API** with exact behaviour parity, so consumer apps switched without rewrites.
- Contribute to **Phoenix (Laravel + Angular)**: APIs, features and decommissioning a legacy integration service.
- **Optimize SQL** and application performance on large attendance data sets.
- Automate workflows with **n8n**; cover critical flows with **Playwright** E2E tests.
- Built an **AI-assisted development harness** on Claude Code: framework skills, release guardrails and a skeptic code-review agent.

Bizmates Philippines Inc.

Jan 2022 – Jul 2022

Software Engineer I

- Converted PDF lessons into reusable HTML/CSS for a web classroom platform.
- Built **Nuxt.js** frontend features on a **Laravel** backend, responsive across devices.

Mariano Marcos State University

Sep 2019 – Jan 2022

Computer Programmer I

- Built and maintained **POS, inventory, payroll, document repository** and **COVID-19 contact tracing** systems.
- Full-stack Laravel + Vue with MySQL, newer systems in React; trained and supported users.

The Black Nazarene Hospital, Inc.

Mar 2019 – Sep 2019

IT Staff

- Built patient records, survey and inventory systems (Laravel, React); trained hospital staff.

Skills

CORE STACK

Laravel · CakePHP · React · Vue · Angular · MySQL

BACKEND

PHP · REST APIs · Authentication · Query tuning

FRONTEND

Nuxt · jQuery · Tailwind CSS · Bootstrap

DEVOPS & QA

Docker · AWS · GitHub Actions · n8n · Playwright · Code review

AI-ASSISTED DEV

Claude Code · GitHub Copilot · Custom agents

PERSONAL PROJECT · 2026

POS Inventory Platform

An 85-endpoint Laravel 13 API serving a web back office, an offline-first Electron desktop app and a React Native mobile app.

Live demo on my portfolio

Education

BS Computer Science, cum laude
Mariano Marcos State University
2014 – 2018

Trainings

Visual Graphics Design NC III
GitHub Training
AWS Training
