Address
Sarrat, Ilocos Norte

Skills

Core Stack
- Laravel, CakePHP
- Angular, Vue, React, jQuery

Frontend
- Tailwind CSS, Bootstrap

Backend / API
- REST APIs, Authentication
- MySQL

Tools
- Git, GitHub
- AWS
- N8N automations
- Docker
- Github Copilot

Specializations

- Full-Stack Web Development
- REST API Design & Integration
- System Optimization & Performance Tuning
- AI Assisted development

Trainings

Visual Graphics Design NCIII
Github Training
AWS Training

Sidney Medrano

Senior Software Engineer

Career Overview

Software Developer with 5+ years of experience specializing in Laravel, Vue, Angular, React, and modern web applications. Experienced in building internal systems, APIs, and scalable web platforms. Strong background in full-stack development and system optimization.

Experience

Cloudstaff Modern Workforce Inc.
Senior Software Engineer I | July 2022 to Present

- Developed and maintained StaffCentral, supporting ~7,000 users for time tracking, leave management, holidays, and log corrections.
- Built HR/Operations reporting tools and maintained legacy CakePHP 1.3 applications.
- Contributed to Phoenix (Laravel + Angular), developing APIs, features, and migration efforts; also worked with React and Vue.js.
- Optimized SQL queries and application performance for large-scale data processing.
- Built n8n workflow automations to streamline business and development processes.
- Leveraged AI-assisted development and AI agents for coding, documentation, and BA/PO workflows.
- Automated end-to-end QA testing using Playwright.

Bizmates Philippines Inc.
Software Engineer I | Jan 2022 to July 2022

- Converted PDF materials into structured, reusable HTML/CSS for a web-based classroom platform
- Developed frontend features using Nuxt.js and supported backend with Laravel
- Ensured responsive, consistent UI across lessons and devices

Mariano Marcos State University
Computer Programmer I | Sep 2019 to Jan 2022

- Developed and maintained multiple internal systems including POS, inventory, payroll, document repository, and COVID-19 contact tracing
- Built full-stack web applications using Laravel and Vue with newer systems on React
- Automated processes to improve administrative and operational efficiency
- Provided system trainings, system support, troubleshooting, and enhancements for deployed applications

The Black Nazarene Hospital, Inc.
IT Staff | Mar 2019 to Sep 2019

- Developed hospital systems for patient records, surveys, and inventory, improving data management and operational efficiency. Tech: Laravel, React
- Provided IT support and system training for hospital staff to ensure smooth adoption of new systems.

Education

Bachelor of Science in Computer Science
cum laude
2014 - 2018
Mariano Marcos State University
